There are lots of flowers and birds in addition to other elements which call to mind the springtime. While the animals are drawn fairly accurately, some of them include “doodle” style elements to enhance the fun of

coloring. The 30 designs are detailed and a few have slightly intricate elements which are fairly small to color. On the whole, it is a book that should be somewhat easy to color but may require a few pens/marker/pencils with tiny tips. This is what I experienced while coloring in this book and testing my coloring medium on the paper: 30 Spring inspired designs with lots of birds and flowers plus other subjects. Printed one side of the page. Paper is typical of CreateSpace: white, thin, slightly rough and non-perforated. Designs do not merge into the binding and there is plenty of room to cut out pages if you choose to do so. The designs have a framing line at the outer edge. Glue Binding. Alcohol-based markers bleed through the page quickly. Water-based markers bleed through in spots. Gel pens and India ink pens leave shadows on back of the page. India ink can bleed through if you apply heavily or multiple coats. Coloring Pencils work well with this paper. I found that I could layer the same color for deeper pigment or multiple colors and I could blend easily using a blending stick. I tested both oil and wax based pencils. I also found that hard lead pencils leave dents through the paper. I like to use a blotter when working in the book. I use a page of card stock or several sheets of heavyweight paper under my working page. It keeps seeping ink and marring dents from ruining the pages below. 2 of 2 people found the following review helpful. Drawings are unique a breathe of fresh air. By LMK Unusual drawings heavily detailed intricate designs. Lots of different flowers in each design such as a bed of mixed flowers instead of animal fur. Drawings encompass the entire page, not cartoon like subjects, some gray shadowing. 2 of 2 people found the following review helpful. Very pretty. By Azul Just beautiful. The book is self-published so the paper quality is your regular CreateSpace paper (= bad). But the artwork is very pretty.
